DATE: _____ FILE #: _____

RE: _____

For over fifty years, the Pleasantview Fire Protection District has made conscientious efforts to protect the people, property, and environment within its boundaries. Consequently, we pre-plan for future circumstances that may arise, including, but not limited to, fire, large-scale medical emergencies, hazardous material incidents, hostage situations, and homeland security concerns. Working together with the municipalities within our District's boundaries, we share information to provide the best protection possible against potential crises.

Therefore, to efficiently pre-plan for future emergencies that could affect the above-referenced property, its occupants, and/or local life-safety personnel, we request the following:

All paper drawings submitted for review to the Pleasantview Fire Prevention Bureau should also be accompanied by an electronic file delivered via e-mail or CD/DVD that contains the electronic files in a format readable by AUTOCAD or ESRI ArcGIS.

- Each drawing layer should either be fully spelled out in written English identifying the layer, or identified through a legend in an attached WORD document, PDF, or on the drawing.
- The drawing should be "to scale" and include the scale conversion.
- *Any modifications made to the drawing or construction project after the original submission should be re-submitted in the format described above.*

If you have any questions, please contact the Pleasantview Fire Prevention Bureau at (708) 352-3021. Your anticipated cooperation is greatly appreciated.
